## THE MARBELLA

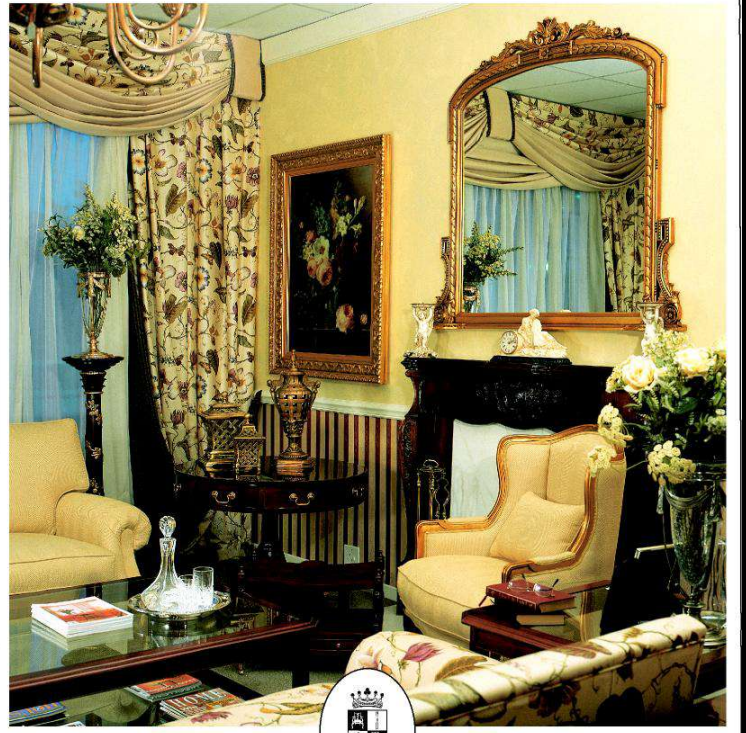

an heirloom diningroom suite  
in exquisitely carved imported beech, available  
in a variety of finishes and offering a choice of  
oval or round glass top dining tables; sideboard,  
server and console table; chairs and carvers  
either padded or cane backed.

- personally selected imported ranges -
- a new selection of crystal lamps, silver and porcelain ornaments and gifts
  - hurricane lamps with pewter or antique brass bases
  - distinguished accessories for the executive study
  - exquisite embroidered 'pin cushion' ornaments for the Christmas tree
  - due in both showrooms from mid-November

**QUALITY ASSURANCE**  
 The standard quality policy statement says many things, what it does not demonstrate is how a company lives the ideals embodied in the words. Any one on any Apollo project have agreement on their minds the final quality assessment of the job. This drives them to complete the task to the highest standards. The plans and procedures required to deliver on this promise are in place and are available for inspection.

**SAFETY**  
 Apollo has an enviable record of maintaining safety on its projects. The industry's growing knowledge of the importance of safety is reflected in the increased awareness of this issue. Particularly as a deciding factor in the awarding of contracts, the company has a fanatical focus on maintaining the highest possible safety standards on all sites. The obvious proof of this is our safety record. Apollo currently has a five star NIOSA rating.

**QUALITY STATEMENT**  
 Company consider the quality of their installations the continuing success of the Company.  
 Quality of quality is to ensure that the formal Quality requirements of SABS ISO 9002 are met, controlled and maintained as required.  
 Relevant elements of the Quality System (planned, measurable objectives shall be established for the various parts of the system) shall be in place for the establishment and achievement of objectives.  
 All personnel shall be trained and shall conform with the requirements of the Quality System.

## ARE YOU STICKING TO DOCTOR'S ORDERS?

2001

**WHY ARE WE TELLING YOU THIS?**

Compliance with treatment as prescribed is very important. 30%-40% of patients do not comply with taking medication as prescribed by their doctors. At least 50% of patients who receive prescribed drugs fail to receive the full benefit as a result of inadequate compliance. This has important implications for the following reasons:

- Health and well-being is reduced.
- Patients may get sicker sooner.
- Health resources are used inefficiently and costs escalate.
- Patients may end up in hospital undergoing costly and lengthy treatment for the complications of being untreated or inadequately treated.

Improved compliance means healthier patients and reduced healthcare costs in the long term. The old adage "Prevention is better than cure" definitely holds true.

Information courtesy of *Drugs Medicines*

**WHY IS IT IMPORTANT TO FOLLOW YOUR DOCTOR'S ORDERS?**

Here are a few examples of what could happen if one does not:

- **Silent Conditions:** Most patients with high blood pressure or high cholesterol are required to take medication for the rest of their lives. In most cases they may not feel ill. It is therefore difficult for them to remember to take their medication regularly as prescribed.
- Because high blood pressure and cholesterol increase the chance of having a heart attack or stroke, it is important that the medication is taken as prescribed.
- **Depressants:** In order to adequately treat depression, a doctor may prescribe anti-depressants for a period of six months or longer. If these medicines are stopped prematurely there is the possibility that the depression may recur, and often makes it more difficult to treat the next time.
